

Rajul Raman

Business Analyst | Healthcare & Data Analytics | SQL · Power BI · Excel

Gurugram | 7870071964 | rajul1raman@gmail.com | linkedin.com/in/rajul-raman-803521123 |
rajul1raman-hash.github.io

Summary

Business Analyst (PGDM Analytics, 2027) who turns operational data into decisions: SQL analysis of 110,521 real appointments, Excel and Google Sheets MIS automation, Power BI reporting. Redesigned a manual KYC process into a digital workflow (30% faster verification) working with product, technology and business teams. Clinical background (BPT, hospital and therapy operations) is a healthcare domain edge.

Projects

Outpatient No-Show Analysis, 110,521 real appointments (SQL) | rajul1raman-hash.github.io

- Queried 110,521 real outpatient appointments in SQL and found the no-show rate rises about 7x with booking lead time (4.6% same-day to 33.0% at 31+ days); 8+ day bookings are 36% of volume but 57% of no-shows.
- Tested the SMS reminder effect with a lead-time stratified comparison: raw rates made SMS look harmful (27.6% vs 16.7%), but within each lead-time band recipients no-showed 2.8 to 7.3 points less (observational).
- Recommended a reconfirmation step for 8+ day bookings plus a measured experiment; scenario estimate (assumes 20% recovery) lowers the overall no-show rate from 20.2% to 17.9%.

Experience

imcure, Business Development Intern | April 2026 - June 2026

- Built an MIS platform in Excel and Google Sheets that automates policy and sales reporting (data flows, KPI tracking), reducing manual effort by 25%.
- Redesigned the as-is manual KYC process into a to-be digital onboarding workflow, cutting manual verification time by 30%.
- Gathered requirements across product, technology and business teams, contributing to 4+ deliverables for imcure's digital platforms.
- Set up Google Ads conversion tracking and integrated third-party partner APIs (diagnostics labs, doctor consultation) to measure customer acquisition and funnel drop-off.
- Owned design and development of the imcure website in HTML, Next.js and Tailwind CSS across 10+ pages, improving page load speed and customer experience.

Cogniable, Physiotherapist | April 2024 - April 2025

- Gathered requirements from multidisciplinary teams and parents to design personalized therapy plans, improving engagement and communication.
- Prepared structured outcome reports across 20+ client progress meetings with stakeholders to support data-driven decisions.
- Introduced Excel-based tracking and standardized documentation, cutting documentation time by 20%.

Park Hospital, Intern | Sep 2023 - March 2024

- Coordinated across wards with doctors, nurses and admin teams to ensure service efficiency and accurate reporting.
- Managed high-volume documentation and reporting with zero compliance issues, ensuring timely cross-department communication.

Skills

Analytics: SQL, MS Excel, Power BI, Google Sheets, Python and R (coursework)

Business Analysis: Requirements Gathering, Process Mapping, As-Is/To-Be Analysis, Stakeholder Management

Domain and Web: Healthcare Operations, KPI Tracking, Reporting, HTML, Next.js, Tailwind CSS

Certifications

- IBM Data Fundamentals (2025): data analysis, SQL, visualization
- LinkedIn Learning: Getting Started with Power BI (2025)

Publication

Prevalence of Adolescent Idiopathic Scoliosis Among School Students, IOSR-JDMS, Vol. 24(5), 2025: screened 205 students (DOI 10.9790/0853-2405047179)

Education

PGDM (Analytics), SOIL School of Business Design, Gurgaon | 2025 - Present (graduating 2027)

BPT, Galgotias University, Greater Noida | 2019 - 2023 | 76.4%

Class XII, Sri Chaitanya, Visakhapatnam (CBSE) | 2014 - 2016 | 74.8%

Class X, S.R DAV Public School (CBSE) | 2014 | 72.2%
